

The Federal Communications Commission

Dear The Federal Communications Commission,

Please, PLEASE don't add yet another tax burden to the citizens who already pay to support EVERYTHING!

In addition (for example): we're paying to fund the incredibly malmanaged war in Irac (for the benefit of big businesses - Haliburton comes to mind), much of our tax monies are egregiously misspent and mismanaged and we pay the salaries of all our employees - many of whom forget for whom they work.

In my opinion, the FCC has other problems to think about and other areas to audit before it needs to spend time considering shifting more tax responsibility to individuals.

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

J. R. Sprague
